

Virtual Urgent CARE

When you need medical attention, reaching a doctor can be difficult, especially if you fall ill in the middle of the night or have a question about your health. Get access to licensed and board-certified physicians whenever you need with our on-demand care services. We are available 24/7/365. Call, tap, or click to get the care you need.

The Virtual Advantage

We offer on-demand care services, treating almost 85% of common illnesses and injuries that can be addressed with a prescription. Furthermore, a year-long study by Humana suggests that medical outcomes with Telehealth are just as good as, if not better than, in-person care.

An Exceptional Service that Reduces Healthcare Costs

Due to most clinics closing around 8 p.m., there has been a noticeable rise in non-emergency visits to the emergency room. This trend is likely a result of the increasing healthcare costs people face. Consequently, an increasing number of individuals are opting for Telehealth services to manage and reduce their healthcare expenditures, ease the financial burden of out-of-pocket costs, and ensure that they have access to medical care whenever it is required.

Common Conditions

In some cases, a visit to the doctor's office can be avoided, saving time and money.

- Flu Symptoms
